- **National Criminal/Sexual Offender/ Social Security Trace/ with Motor Vehicle Report (prices vary by state – call Trak-1 for pricing)**

Instant Criminal Record Search – Updated Regularly

National Criminal Searches are comprised of information provided from various state reporting agencies including but not limited to the Department of Public Safety, The administrator of the Courts, and the Department of Corrections. Information provided includes Subject description, felony and misdemeanor charges and convictions, file date, and disposition. B2B Data Solutions now offers use of the nation's top national criminal databases currently being offered. All files included criminal jurisdictions as outlined in the criminal description attachment. All files are updated monthly unless restricted by the governing agency.

Sexual Offense Reports are now available through a specific database for most states. Our use of a combination of direct on-line accessibility, as well as direct research, allows us to attain the most up-to-date and accurate information available.

County Criminal Searches Trak-1™ researches potential criminal records for each applicant on a county-by-county base as set forth in your criteria. Prices and response time can fluctuate depending on the location requested.

State Criminal Searches are available for various states located throughout the U.S., some states still do not have an accessible database. State criminal searches provide a statewide search for misdemeanors and felonies for an individual. State searches are beneficial but are only as accurate as the counties that report to the state. Not all counties report to the state agency in a timely manner.

Social Security Trace

Acting as an identifier, this search reveals social security #, date of birth, present and past addresses, employers and aliases. This trace might make you aware of incongruous applicant information.

Motor Vehicle Reports (DMV)

DMV reports provide a wealth of personal data that can be used for cross-reference, and criminal offenses pertaining to motor vehicles which may not be revealed by other criminal checks. DMV reports are highly recommended on all applicants, especially those who drive company vehicles or use their personal vehicle for company purposes. Motor vehicle reports are restricted by law and may only be used for screening job applicants as defined by law under Permissible Purpose. Trak-1 only provides MVR reports to established commercial customers. Customers are required to submit an authorized signature from each applicant, for each request.
